Also available (to order only) are specialised rubber coatings for foam, EVA, etc. Enquiries welcome.

F-674	F-674 is an acrylic waterbase coating designed to protect polystyrene and expanded polystyrene foams from impact damage as well as improve appearance.
F-717	F-717 and F-719 are synthetic rubber coatings that exhibit the ultimate in durability and strength in the foam coatings industry. Their unbeatable flexibility and elongation range from -30°F to 200+°F.
F-753	F-753 is a vinyl based coating used to seal unskinned polyurethane foams. F-753 can also be used on closed cell foam containing vinyl.
F-830	F-830 is a vinyl based coating used to seal unskinned polyurethane foams. F-830 can also be used on skinned polyurethane and closed cell foam containing vinyl.
